

ASSIGNMENT 8

Subqueries

Follow the same formatting guidelines as the previous homework assignment.

YOU must use subqueries. Do not put any codes in your SQL statements. When pasting your results, just provide the first five rows of output if your result set exceeds five rows

1

Copy and paste the contents of student.txt into your SQLPlus session. Rename the tables such that they are all prefixed with the first five letters of your lastname such as sabze_student. Make sure that the tables (student, class and student_class) are all renamed properly before you continue. You don't need to paste anything from SQLPlus for this question.

1

Using a single SQL statement display fname,lname of all the students who are taking Database Programming regardless of case.

161 | Select fname, lname from Hert_student WHERE ssn IN(SELECT ssn FROM Hert_student_class
162 | WHERE class_code in(SELECT class_code FROM Hert_class WHERE lower(class_description)
163 | LIKE '%database programming%'));

Script Output x

Query Result x

SQL | All Rows Fetched: 3 in 0.047 seconds

	FNAME	LNAME
1	Johnson	White
2	Abraham	Bennet
3	Innes	del Castillo

2

Using a single SQL statement display all the rows from the student_class table where class description is not null

167 | SELECT * FROM Hert_student_class WHERE class_code IN(SELECT class_code
168 | FROM Hert_class WHERE class_description IS NOT NULL);

	<div>Script Output x Query Result x</div> <div> All Rows Fetched: 10 in 0.047 seconds</div> <table><thead><tr><th></th><th>SSN</th><th>CLASS_CODE</th></tr></thead><tbody><tr><td>1</td><td>172-32-1176</td><td>37</td></tr><tr><td>2</td><td>213-46-8915</td><td>32</td></tr><tr><td>3</td><td>267-41-2394</td><td>34</td></tr><tr><td>4</td><td>409-56-7008</td><td>37</td></tr><tr><td>5</td><td>427-17-2319</td><td>34</td></tr><tr><td>6</td><td>472-27-2349</td><td>32</td></tr><tr><td>7</td><td>672-71-3249</td><td>3</td></tr><tr><td>8</td><td>712-45-1867</td><td>37</td></tr><tr><td>9</td><td>846-92-7186</td><td>32</td></tr><tr><td>10</td><td>998-72-3567</td><td>3</td></tr></tbody></table>		SSN	CLASS_CODE	1	172-32-1176	37	2	213-46-8915	32	3	267-41-2394	34	4	409-56-7008	37	5	427-17-2319	34	6	472-27-2349	32	7	672-71-3249	3	8	712-45-1867	37	9	846-92-7186	32	10	998-72-3567	3
	SSN	CLASS_CODE																																
1	172-32-1176	37																																
2	213-46-8915	32																																
3	267-41-2394	34																																
4	409-56-7008	37																																
5	427-17-2319	34

8	712-45-1867	37																																
9	846-92-7186	32																																
10	998-72-3567	3																																
3	<p>Using a single SQL statement display fname, lname of all the students whose first name is anything except John, Jack or Bob. and are taking the operating systems class and their phone number is null</p> <pre>171 Select fname, lname from Hert_student WHERE fname not in('John', 'Jack', 'Bob') AND phone is not NULL 172 AND ssn IN(Select ssn FROM hert_Student_class Where class_code IN(Select class_code FROM Hert_class 173 WHERE lower(class_description) like '%operating system%'));</pre> <div>Script Output x Query Result x</div> <div> All Rows Fetched: 0 in 0.063 seconds</div> <table><thead><tr><th></th><th>FNAME</th><th>LNAME</th></tr></thead></table>		FNAME	LNAME																														
	FNAME	LNAME																																
4	<p>Using a single SQL statement display ssn, fname, lname, age/2 of all the students whose first name begins with the letter J and age is greater than 25 and are taking any class that contains 'Intro' in its description (Have to convert the dob into a number). Order the results by age/2 in descending order. Use an alias for the order by clause</p> <pre>176 Select ssn, fname, lname, (Round(MONTHS_BETWEEN(sysdate, dob))/12)/2 As age FROM Hert_student 177 WHERE upper(fname) Like 'J%' AND Round(MONTHS_BETWEEN(sysdate, dob))/12 > 25 178 AND ssn IN(Select ssn FROM Hert_student_class WHERE class_code IN(Select class_code FROM 179 Hert_class WHERE upper(class_description) LIKE '%INTRO%')) ORDER by age Desc;</pre> <div>Script Output x Query Result x</div> <div> All Rows Fetched: 0 in 0.046 seconds</div> <table><thead><tr><th></th><th>SSN</th><th>FNAME</th><th>LNAME</th><th>AGE</th></tr></thead></table>		SSN	FNAME	LNAME	AGE																												
	SSN	FNAME	LNAME	AGE																														
5	<p>Using a single SQL statement display fname, lname from the student</p>																																	

	table where last name contains the letters 'nn' (e.g. Benny, Bonny, Sonny) and is enrolled in any class that contains the letter 'h' in its description regardless of case. Order the results by lname. When using order by use the position and not the name of the column
	<pre> 182 Select ssn, fname, lname FROM Hert_student 183 WHERE lname Like '%nn%' 184 AND ssn IN(Select ssn FROM Hert_student_class 185 WHERE class_code IN(select class_code FROM 186 Hert_class WHERE upper(class_description) like '%H%')) 187 Order by 2; </pre> 
6	Using a single SQL statement, delete all the rows from the class table for all classes that are associated with students who live in Sacramento and earn less than 15000 (NOTE: you are deleting from the class table)
	<pre> 190 DELETE FROM Hert_class WHERE class_code IN(SELECT class_code FROM Hert_student_class 191 WHERE ssn IN (SELECT ssn FROM Hert_student WHERE upper (city) Like '%SACRAMENTO%' AND salary < 15000)); </pre> 
7	Using a single SQL statement use a combination of create and select to create a new table called class2 that contains the list of all the classes that are taken by students who are older than 30 years old
	<pre> 195 Create table Hert_class2 AS Select * FROM Hert_class WHERE class_code IN(SELECT class_code 196 FROM Hert_student_class WHERE ssn IN(SELECT ssn FROM Hert_student WHERE ROUND 197 (MONTHS_BETWEEN(sysdate, dob))/12 > 25)); </pre> 
8	Update the salary to 75000 for all students who are enrolled in 'Database programming' regardless of case and live in CA
	<pre> 200 UPDATE Hert_student Set salary = 75000 WHERE ssn IN(Select ssn FROM Hert_student_class 201 WHERE class_code IN(SELECT class_code FROM Hert_class WHERE Upper(class_description) 202 Like '%DATABASE PROGRAMMING%')) AND Upper(state) = 'CA'; </pre>

	<div>Script Output x</div> <div>Query Result x</div>
	<div> Task completed in 0.047 seconds</div>
	<div>1 rows updated.</div>
