Cost Estimate – MK Active
Team: GoGitters
Spring 2024

1. Though the final method of distribution is yet to be decided by the product owner, as of this moment it is likely that this application will not be present on either the Apple or Android App stores, requiring no cost from the product owner.

2. Development is planned to occur using Flutter Flow; this is a free program for students for a year, which has no cost to the product owner.

3. Database fees will incur a cost; due to few customers, it is possible that the product owner may pay as little as $10 USD per month, though the product owner may wish for a more expensive plan that provides greater storage capacity.

4. As this will potentially be a web app, domain fees will be incurred. These can start around $20 USD per year.

The professor was added to our Jira using his csus email.
