# GroupUnion

1) Display the name and the corresponding description based on the candidates salary **(Use union and be cautious of the types) Order by name**

| | |
|---|---|
| < 50000 | Honest |
| >50000 and < 100000 | Not so honest |
| >100000 | 80000 |

<br><br><br>

2) Display the name and the corresponding description based on the candidates salary **(Use a plain case statement in chapter 5)**

| | |
|---|---|
| < 50000 | Honest |
| >50000 and < 100000 | Not so honest |
| >100000 | 80000 |

<br>

3) Display the name of all the people who are not associated with a party (use not in). This is a bit tricky because people who don't have a party_id will have a null and you cannot compare a null using not in because it doesn't know how to deal with non-data. You can put the party_id in an NVL function in the where clause to resolve this issue

<br>

4) Repeat question 3 using (not exists)

<br>

5) Repeat question 3 using (minus)
